

New for 2026

A large yellow Caterpillar haul truck is the central focus, parked on a pile of dark, jagged rocks in a quarry. In the background, an excavator is visible, dumping material into the truck's bed. The scene is set against a backdrop of a rocky hillside under a hazy, overcast sky. The lighting is dramatic, with a strong yellowish-gold glow emanating from the right side, highlighting the dust and the machinery.

CD-40 is a superior quality 100% synthetic non-EP transmission fluid formulated for extended drain intervals and improved fuel economy. Recommended for AMT (Automated Manual Transmission) and manual transmissions requiring Eaton PS-386 transmission fluid.

TDH SYN is a superior quality 100% synthetic TDH formulated for all-season applications and exceptional tolerance to water contamination. Recommended for CVT and IVT (Infinitely Variable Transmission) tractor transmissions as well as equipment with centralized lubrication.

TO-4 SYN is a superior quality 100% synthetic transmission fluid formulated for maximum protection and energy savings. Recommended for transmissions and hydraulic systems requiring an all-season Caterpillar TO-4 lubricant. Available in 0W-20 and 5W-30 viscosities.

ATF HD-T6 is a superior quality 100% synthetic automatic transmission fluid formulated for unsurpassed protection and performance. Recommended for transmissions requiring an Allison TES-668 fluid.
